

Electronic Quality Measures for Hospitals

ENCOR-eh is an industry-leading ONC certified application designed to assist hospitals in meeting their electronic quality measures (eCQM) reporting requirements for CMS Inpatient Quality Reporting (IQR), Meaningful Use and The Joint Commission ORYX performance improvement programs.

Automated daily EHR data extracts makes reporting efficient and timely.

ENCOR-EH has mobile-ready dashboards, with drill down capability to case level detail, provide hospitals with the tools needed to monitor quality and improve performance.

For more information, or to schedule a demonstration, contact us at (844) MEDISOLV or visit us at medisolv.com.

ENCOR-eh BENEFITS

- Graphic visualization of the measure algorithm helps hospitals easily pinpoint where patients passed, failed or were excluded from a population.
- Snapshots of data files submitted to CMS assist hospitals in the event of a future audit.
- Intuitive mobile dashboards with drill down capability provide internal reporting and monitoring of quality and utilization thresholds.
- QRDA I file submission for Electronic Clinical Quality Measures (eCQMs).
- Certified for all 29 eCQMs.

Medisolv's comprehensive, hands-on implementation and support will enable your hospital to seamlessly transition to ENCOR-eh.

COMPREHENSIVE IMPLEMENTATION PROCESS

Medisolv clinical consultants will work closely with your staff to:

- Navigate complex eCQM specifications and multiple requirements of TJC and CMS quality reporting programs.
- Assist in best-practice work-flows for accurate and reliable data capture at the point of care and in post-discharge abstraction.
- Ensure timely data submission to CMS and TJC.

The ENCOR Quality Reporting Software Solution has earned the exclusive endorsement of the American Hospital Association.
