

# Electronic Quality Measures for Providers

**ENCOR-ep** is an industry-leading ONC certified application designed to meet Electronic Clinical Quality Measures (eCQMs) reporting requirements in CMS Physician Quality Reporting System (PQRS) and Meaningful Use programs.

Reporting at both the individual and group practice level (GPRO) is fully supported.

Automated daily EHR data extracts makes it efficient and timely.

ENCOR-ep has mobile-ready dashboards, with drill down capability to case level detail, provide hospitals with the tools needed to monitor quality and improve performance.

For more information, or to schedule a demonstration, contact us at (844) MEDISOLV or visit us at [medisolv.com](http://medisolv.com).

## ENCOR-ep BENEFITS

- Graphic visualization of the measure algorithm helps hospitals easily pinpoint where patients passed, failed or were excluded from a population.
- Snapshots of data files submitted to CMS assist hospitals in the event of a future audit.
- Intuitive mobile dashboards with drill down capability provide internal reporting and monitoring of quality and utilization thresholds.
- Both QRDA I or QRDA III file submissions for Electronic Clinical Quality Measures (eCQMs) supported.
- 2014 Edition Certification for all 64 eCQMs with 2015 specification updates.
- Supports Meaningful Use Objective Measures reporting.

## COMPREHENSIVE IMPLEMENTATION PROCESS

Medisolv clinical consultants will work closely with your staff to:

- Navigate complex eCQM specifications and multiple requirements of CMS quality reporting programs.
- Assist in best-practice work-flows for accurate and reliable data capture at the point of care.
- Ensure timely data submission to CMS and TJC.

The ENCOR Quality Reporting Software Solution has earned the exclusive endorsement of the American Hospital Association.
